Introduction
The UNC School of Dentistry owns and manages hundreds of personal computers and thousands of application programs. Legal, logistic and financial forces require OCIS to inventory the applications used on SoD computers.

Purpose of Policy
To outline the responsibilities of OCIS and SoD units with regards to the applications used within the School of Dentistry.

Audience
This Policy applies to all UNC SoD computing devices owned or managed through UNC-Chapel Hill.

Definitions
Application – An application, or application program, is a software program that runs on a computer. It is a program designed to perform a specific function directly for the user.

End User License Agreement (EULA) – A legal contract between the manufacturer and/or the author and the end user of an application. The EULA details how the application can and cannot be used and any restrictions that the manufacturer imposes (e.g., most EULAs of proprietary software prohibit the user from sharing the software with anyone else).

Software – Software is the general term for the various kinds of programs used to operate computers and related devices. Application software performs a specific function for the user of a computer, and system software is the interface between the hardware and user applications.

Software License – A legal instrument (usually by way of contract law, with or without printed material) governing the use or redistribution of software. Under US copyright law all software is copyright protected, except material in the public domain.

Software Registration – A process through which an end user transfers required registration information and the software owner transfers consent to the license. Successfully registering a software application often activates the software for legal use by the end user or enterprise.

---

1 For purposes of this Policy, the term “Computing Devices” means desktop, laptop or tablet computers.
2 For purposes of this Policy, the terms “End User License Agreement” and “Software License” are synonymous

Application Inventory, Support and Registration

Policy

Policy Statement
1. All publically available software installed on School-owned or managed computing devices must be approved, legal, licensed and registered for use.
2. OCIS will use technical means to inventory the resident application software on all School-owned desktop and laptop computers.
3. The Department or individual (Faculty, Staff, Student, Temporary Employee, Visitor) to whom the application software is registered is responsible for contacting the application publisher for support/assistance specific to that application.
4. Personally owned devices are the responsibility of the individual owner, unless the purchase was required for an academic program and the software was required for the program (see CYOD policy).
5. OCIS is responsible for the support and maintenance of all servers and operatory workstations.
6. OCIS support of desktop and laptop application programs is limited to “Good faith effort” to return an application program to a functional/usable state. OCIS will not make any attempt to fix or repair software errors found within commercial application software.

Compliance

SoD could be held liable for unlicensed software that is installed on School computers, whether the installation was intentional or not. The consequences could include being required to purchase additional software, pay fines and undergo a resource-intensive audit process.

Compliance Statement

Failure to adhere to this policy and its procedures and standards may adversely affect financial and/or legal position of the School. Any non-registered (non-legal) application software (or copies running the same license key) operating on School-owned computing devices is subject to immediate removal by OCIS. “Fair Use”, codified in 17 U.S. Code §117 and amplified by UNC Chapel Hill Campus Copyright Policy will be determined by the Office of University Counsel. Employees failing to comply with this Policy may face serious consequences up to and including termination of employment. Students intentionally installing non-registered or copied application software are subject to immediate removal by OCIS. Any non-registered software, including copies running the same license key, will be removed by OCIS. The Office of University Counsel may also hold employees liable for any unlicensed software that is installed on School computers, whether the installation was intentional or not. The consequences could include being required to purchase additional software, pay fines and undergo a resource-intensive audit process.

---

3 “Good faith effort” is an implied contractual term and it is defined as “what a reasonable person would determine is a diligent and honest effort under the same set of facts or circumstances” Troutt v. City of Lawrence, 2008 U.S. Dist LEXIS 61641 (S.D. Ind. Aug 8, 2008)
4 Such practice, known as Software Piracy, is Unauthorized duplication, distribution or use of someone else’s intellectual property, including computer software, constitutes copyright infringement (17 U.S. Code §117) and is illegal and subject to both civil and criminal penalties.
software on School-owned devices will be subject to the Honor Code, or other disciplinary actions including, but not limited to, probation and dismissal.

Roles and Responsibilities
OCIS shall create, distribute and maintain a set of processes and procedures to conduct, record and retain an inventory of existing software.

Procedures to comply with policy
1. Users of School-owned computing devices contact OCIS (see below) for support and assistance.
2. Users of personally owned computing devices may refer to the Campus Help and Support Web page, the UNC Help Desk (see below) or contact the application publisher for support. OCIS will provide “good faith effort” support for software required on CYOD computers.
